Industry Names Instrumentix Best Trading Infrastructure Monitoring Platform Again

Award recognises firm's innovation and leadership in helping to provide a competitive edge in electronic markets

London, June 16th, 2022 – Instrumentix, a leader in performance monitoring and analytics for global financial markets, has been awarded “Best Trading Infrastructure Monitoring Platform” for its xMetrics® product in A-Team Group’s TradingTech Insight Awards USA 2022.

This comes just shortly after winning the same category in the TradingTech Insight Awards Europe 2022 earlier in the year.

As trading systems have become ever faster, increasingly interconnected, and process ever more data there has never been a greater need for accurate and comprehensive monitoring and analysis of the infrastructure that underpins them. Understanding the link between technology efficiency and trading performance is crucial in the drive to optimise execution outcomes in order to gain competitive edge.

xMetrics® is the only high performance, modular, open, distributable software solution available, and crucially can be run on commodity hardware. This means that xMetrics® is hugely scalable and can be deployed into environments (including the cloud) in a way that historically would have been far too complex or prohibitively expensive.

Angela Wilbraham, CEO at A-Team Group, said: “Congratulations Instrumentix for winning Best Trading Infrastructure Monitoring Platform in the fourth annual TradingTech Insight Award USA. This year’s TradingTech Insight USA awards have been extremely popular and competitive, highlighting established solution providers and innovative newcomers within capital markets that provide exceptional trading infrastructure, trading technology, and data solutions.

xMetrics® facilitates powerful data enrichment and transformation by allowing the user to interact directly with the data it is creating. This critical feature not only allows external data to be used in enrichment, but more importantly allows for the introduction of User Defined Functions into the instrumentation path that can be used to transform – in real time- any and all data. Given the availability of this key feature, emerging and future requirements can be tackled with ease.

“For forward-thinking capital markets firms, instrumentation is no longer an afterthought, it is included in the very design of their trading infrastructure.” said Steve Hicks, Founder and Chief Technology Officer. “Instrumentation is crucial in providing constant verifiable execution efficiency, safeguarding customer experience and driving operational improvement.” “We are delighted that the industry has again recognised our best-in-class capabilities and sincerely thank our supporters who took the time to vote for us.”

About InstrumentiX

Instrumentix is a leader in performance monitoring and analytics for global financial markets.

xMetrics®, a unique modular trading infrastructure monitoring and analytics solution, provides an end-to-end, real-time view of some of the world's most complex trading environments. Committed to continuous innovation, Instrumentix ensures market participants receive the actionable insight and transparency needed to optimise execution outcomes, drive business improvement, and comply with regulatory requirements.

Instrumentix takes immense pride in partnering with our clients to help them gain competitive edge.
