Industry Names InstrumentiX Best Trading Infrastructure Monitoring Platform

Award recognises firm's innovation and leadership in helping to provide a competitive edge in electronic markets

London, February 22nd, 2022 – InstrumentiX, a leader in performance monitoring and analytics for global financial markets, has been awarded “Best Trading Infrastructure Monitoring Platform” for its xMetrics® product in A-Team Group’s TradingTech Insight Awards Europe 2022.

As trading systems have become ever faster, increasingly interconnected, and process ever more data there has never been a greater need for accurate and comprehensive monitoring and analysis of the infrastructure that underpins them. Understanding the link between technology efficiency and trading performance is crucial in the drive to optimise execution outcomes in order to gain competitive edge.

xMetrics® is the only high performance, modular, open, distributable software solution available, and crucially can be run on commodity hardware. This means that xMetrics® is hugely scalable and can be deployed into environments (including the cloud) in a way that historically would have been far too complex or prohibitively expensive.

“It has been fantastic to see such a high calibre of entries in our TradingTech Insight Awards Europe 2022. There are some really deserving winners and we congratulate InstrumentiX on winning Best Trading Infrastructure Monitoring Platform and for their contribution to the financial trading technology industry.” said Angela Wilbraham, CEO of A-Team Group, hosts of the TradingTech Insight Awards Europe.”

xMetrics® facilitates powerful data enrichment and transformation by allowing the user to interact directly with the data it is creating. This critical feature not only allows external data to be used in enrichment, but more importantly allows for the introduction of User Defined Functions into the instrumentation path that can be used to transform – in real time - any and all data. Given the availability of this key feature, emerging and future requirements can be tackled with ease.

“For forward-thinking capital markets firms, instrumentation is no longer an afterthought, it is included in the very design of their trading infrastructure.” said Steve Hicks, Founder and Chief Technology Officer. “Instrumentation is crucial in providing constant verifiable execution efficiency, safeguarding customer experience and driving operational improvement.” “We are delighted that the industry has recognised our best-in-class capabilities and sincerely thank our supporters who took the time to vote for us.”

About InstrumentiX

InstrumentiX is a leader in performance monitoring and analytics for global financial markets.

xMetrics®, a unique modular trading infrastructure monitoring and analytics solution, provides an end-to-end, real-time view of some of the world's most complex trading environments. Committed to continuous innovation, InstrumentiX ensures market participants receive the actionable insight and transparency needed to optimise execution outcomes, drive business improvement, and comply with regulatory requirements.

InstrumentiX takes immense pride in partnering with our clients to help them gain competitive edge.
